KAZAN AIRFRAME PLANTS NO. 387A and B
55 48 04N - 049 03 35E
55 51 22N - 049 02 50E

25X1D

25X1D The Kazan Airframe Plants 387A and B were first covered by photography and they contained at that time approximately 498,325 square feet of floorspace, respectively (Figures 1 and 2). A comparison of this photography with that from 25X1D

25X1D shows no major changes at airframe plant no. 387A, but shows additions to the assembly facilities at plant 387B (old NW airfield facilities) containing approximately 255,310 square feet of floorspace (Figures 1 and 2).

25X1D The additions to plant 387B include an assembly/subassembly building (Item 1, Table 2, Figure 1 and 2), a rail spur, and nine small storage/workshop buildings. Construction of the assembly/subassembly building and the rail spur was in evidence in 25X1D. The assembly/subassembly building, the rail spur and the nine minor buildings appeared complete on photography of 25X1D

25X1D The sod landing area of plant no. 387B appears to be no longer operational for conventional aircraft, but is serviceable as a flyaway field for helicopters. 25X1D
25X1D The original plant 387A was constructed prior to 25X1D with the exception of (Item numbers 4, 11 and 13, Table 1) which were completed when next observed on TALENT photography dated 25X1D. Plant 387B with the exception of (Item number 1, Table 2) was completed between 25X1D

Tables 1 and 2 contains the description and dimensions of the major buildings comprising airframe plants 387A and B. All measurements were made by the NPIC Technical Intelligence Division, with the exception of the item numbers marked with an asterisk. These height and horizontal measurements were compiled by the CIA/IAD analyst, and should only be considered approximate.

Plants no. 387A and B are served by 4,800 and 10,500 feet of rail spurs respectively. Roads totaling 2,500 and 3,500 feet of hard-surfaced, probably concrete, with an average width of 20 feet serve the two plants. The two plants are encompassed by a solid board fence 7,000 and 21,000 feet long, respectively (Figures 1 and 2).
